

**We are very happy to have our doors open again and welcome the children back. It has been great seeing all the children again after so long!**

The children have settled back into nursery really well and have loved sharing stories about what they have been doing whilst nursery has been closed.

We have enjoyed lovely weather and the children have been taking part in bug hunts outside. This led to us making bug houses using open ended resources and we have now started to make a fairy/dinosaur garden outside with the children helping to make little houses and toadstools using the clay.

We held an emotions week where we made worry dolls to help the children returning to nursery after being off for three months. We also talked about our feelings and made salt dough emotion stones.

We have also been exploring birds after Connor brought in a birds nest from home and told us all about the eggs in the nest and how they hatched. This led to the children going on a bird hunt outside and using sticks we had found to create our own birds nest.

The children have been showing interest in colours and rainbows. Through this the children have been painting their own rainbows and also took part in a skittle colour changing activity.
